9-30803

Remote dsiplay unit - relay expansion card

Description

The RDU relay expansion card is a relay card which provide relay outputs for the 4 alarms flags and fault indication, and fits onto the back for the RDU(9-30802)

The RDU(9-30802) is a LED bargraph repeater and status display, which is used to remotely mimic the status of a Stratos ASD. It comes in 19” rack format, that allow for multiple units to be mounted next to each other in a 19" rack, or individually with the support of the 9-30817 housing.

Details

- 4 Alarm flags and fault outputs
- Mounting onto the back of the RDU
- 5 relay outputs

9-30803

Remote dsiplay unit - relay expansion card

Technical specifications

Electrical

Operating voltage	Directly from the RDU

Output

Output type and rating	500 mA @ 30 V

Physical

Physical dimensions	53 x 108 x 15 mm (W x H x D)

Environmental

Operating temperature	-10 to +60°C
Relative humidity	0 to 90% noncondensing
Environment	Indoor

Regulatory

Certification	EN54-20
