# ZP755-COV-P

## Ziton series Detector Base Cover (Polar White)

### General

Designed to be used with the ZP755B series base sounders and notification devices, the ZP755-COV-P is a POLAR WHITE cap that allows these notification devices to be used in standalone mode, as normal room devices i.e. without a device in the base. This reduces the number of costly products on the shelf for many customers, reducing the number of notification SKUs they need to carry in stock.

### Other applications

As the ZP755-COV-P may be fitted to any Ziton ZP7 series detector base, other applications include:

… protecting an installed Ziton detector base when it is not in use, avoiding the need to remove the base from the ceiling and rewiring the detection loop as a result. This saves extensive installation and maintenance time and related cost.

… changing a base isolator into a stand-alone isolator, reducing the complexity of the variations of isolators that needs to be installed. As a consequence installations are simplified and the chance of cabling errors reduced.

### Options

Depending on the colour requirement, the ZP755-COV is also available in RED (order code: 70802)

### Details

- Easy to install
- Easy to clean
- Converts a base notification application to a standalone notification application
- Protects loop cabling in unused detector bases
- Converts an isolator base application into a standalone isolator application
